

## Working With The Dataset

### Loading The Dataset

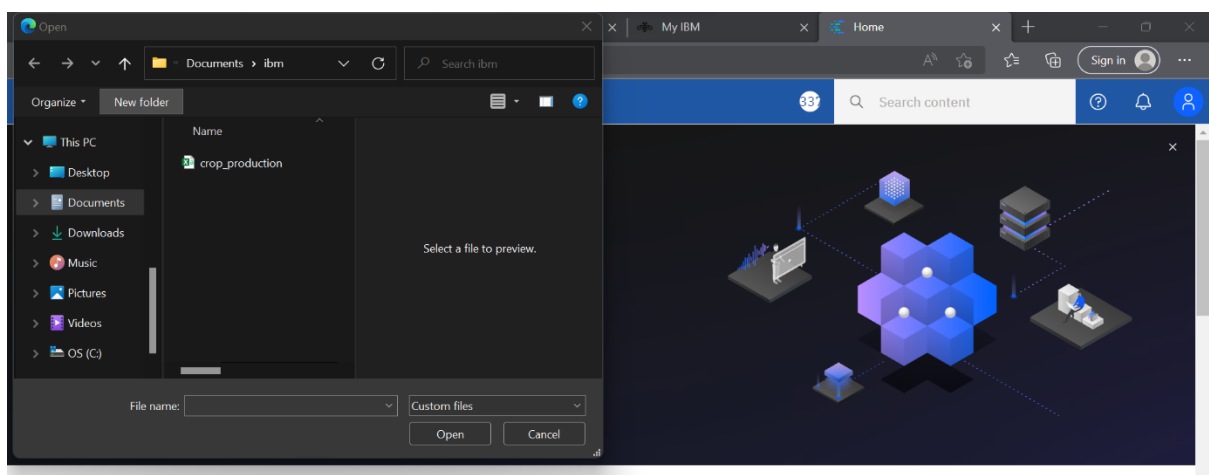

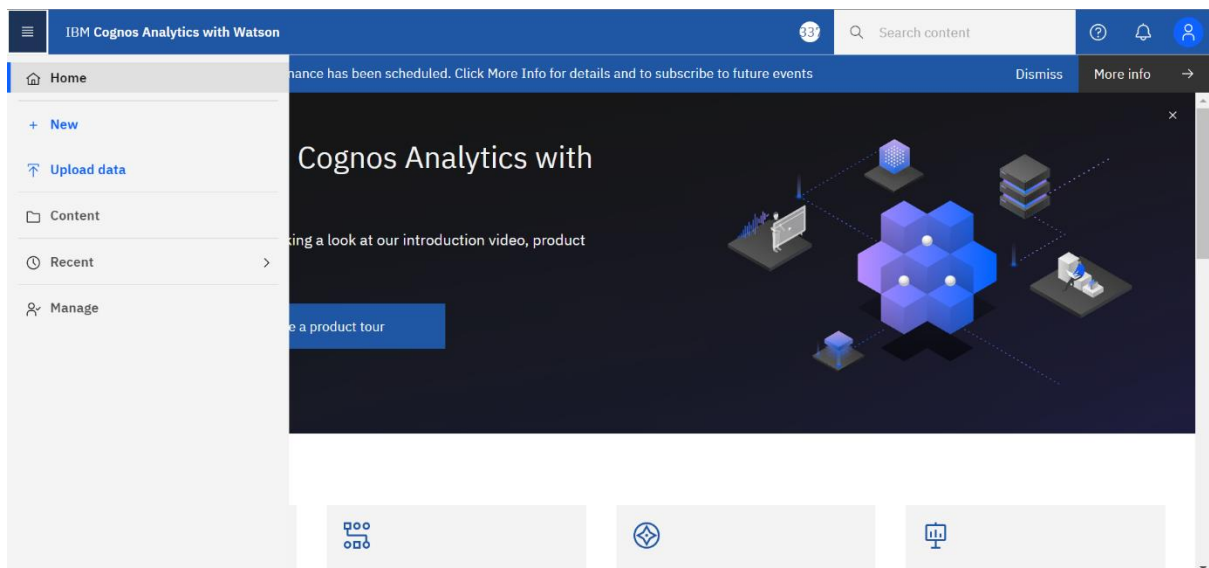

Team ID	PNT2022TMID41233
Project Name	Estimate the Crop Yield using Data Analytics

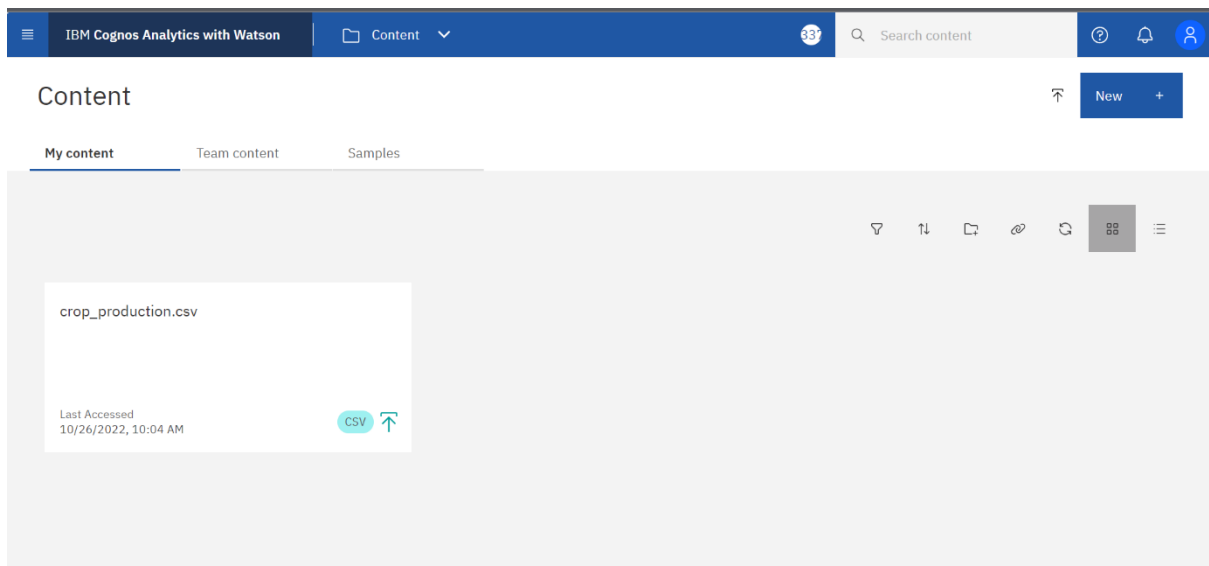

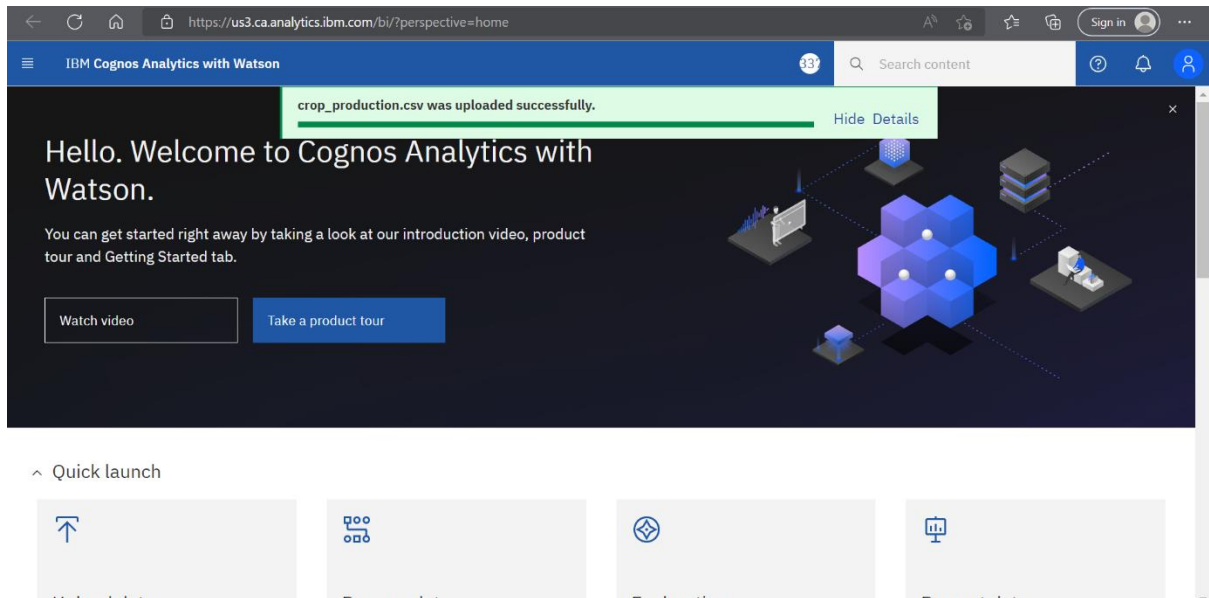

### Loading The Dataset:

Before we build a view and analyze our data, we must first connect the data to IBM Cognos. Cognos supports connecting to a wide variety of data, stored in a variety of places.

The data might be stored on our computer in a spreadsheet or a text file, or in a big data, relational, or cube (multidimensional) database on a server in your enterprise. In our case, we will be using a spreadsheet or text file for making our analysis.

### Uploading the Dataset:

The dataset was successfully loaded in IBM Cognos Analytics.
